CEREUS THURBERI MONSTRUOSA

COLLECTED AND CULTIVATED BY
Dr. Richard E. Kunze
PHOENIX, ARIZONA, U. S. A.
1909.

MAMILLARIA GOLZIANA

OPUNTIA KUNZEI. NOV. SPEC.

Dr. Richard E. Kunze, Collector and Exporter of North American Cactaceæ

INTRODUCTION

We take pleasure in presenting this Price-list to our friends and patrons, thanking all for past favors and begging for a continuance of the same.

All of the enumerated Cacti are original specimen plants, directly brought from their natural habitat, if not already cultivated in our Cactus garden. The only exceptions refer to the very smallest of enumerated species. From time to time additions will be made to this list, and we always shall endeavor to furnish strong, healthy and symmetrical plants.

We make no charge for packing, which is done in a careful manner to insure safe arrival of invoice at destination. After taking receipt in good order from the Forwarding Company, our responsibility ceases. Mailing orders receive prompt attention.

New patrons are requested to accompany their order with one-half the amount of bill by draft, check on New York, money order or registered letter.

1 Dollar=100 Cents=4 English Shilling=5 Franc=4 Mark.

1 Inch=25 Millimeter. 1 Kilo=2 lbs.

“ “ medium size.....

“ “ large size.....

For Botanical Gardens and the decoration of Public Institutions, we can furnish much larger specimens than here enumerated.

When we cannot fill large orders for very small plants, we always substitute a larger size for the same price, counting the stems or segments of each clump for a single small plant. We do not raise cacti from seed, and seedling plants of the desert are few in proportion to large specimens which we collect. We commence to ship plants March 1st to northern States and Europe.

We collect plants for the United States National Museum of Washington, D. C., Botanical Gardens of many Cities, Royal Botanical Gardens of England, and Royal Botanical Museum and Garden of Berlin, Germany, Imperial Botanical Gardens of St. Petersburg, Russia and others.

Dr. R. E. Kunze.
